### **CRYPTAUR PLATFORM AND RELATED RISKS**

Cryptaur ecosystem which is describes in smart book (hereinafter referred to as “the Platform) is the main product to which CPTs are related.

The financial technology and cryptocurrency industries and the markets in which Cryptaur competes have grown rapidly and continue to evolve in response to new technological advances, changing business models and other factors. As a result of this constantly changing environment, Cryptaur may face operational difficulties in adjusting to the changes.

Cryptaur business also relies on its Blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, Blockchain technology and smart contract technology, and to manage technical support infrastructure for the Cryptaur Platform effectively, Cryptaur will need to continue to upgrade and improve its data systems and other operational systems, procedures and controls. These upgrades and improvements will require a dedication of resources, are likely to be complex and increasingly rely on hosted computer services from third parties that we do not control. If we are unable to adapt our systems and organisation in a timely, efficient and cost-effective manner to accommodate changing circumstances, our business, financial condition and results of operations may be adversely affected. If the third parties whom we rely on are subject to a security breach or otherwise suffer

disruptions that impact the services we utilise, the integrity and availability of internal information could be compromised, which may consequently cause the loss of confidential or proprietary information, and economic loss. The loss of financial, labour or other resources, and any other adverse effect on Cryptaur's business, financial condition and operations, would have a direct adverse effect on Cryptaur's ability to maintain Cryptaur Platform.

We, Cryptaur, may also experience system failures, unplanned interruptions in its network or services, hardware or software defects, security breaches or other causes that could adversely affect the infrastructure network, and/or the Cryptaur Platform.

We are not able to anticipate when there would be occurrences of hacks, cyber-attacks, distributed denials of service or errors, vulnerabilities or defects in the Cryptaur Platform, CPTs, the accounts or the wallets, or any smart contract technology on which the Cryptaur Platform, CPTs, the accounts and the wallets, or on the Ethereum Blockchain or any other Blockchain.

Such events may include, for example, flaws in programming or source code leading to exploitation or abuse thereof. We may not be able to detect such hacks, cyber-attacks, distributed denials of service, errors, vulnerabilities or defects in a timely manner, and may not have sufficient resources to efficiently cope with multiple service incidents happening simultaneously or in rapid succession.

Cryptaur's network or services, which would include the Cryptaur Platform could be disrupted by numerous events, including natural disasters, equipment breakdown, network connectivity downtime, power losses, or even intentional disruptions of our services, such as disruptions caused by software viruses or attacks by unauthorised users, some of which are beyond our control. Further, cryptography is evolving and advances in cryptography such as code cracking, or technical advances such as the development of quantum computers, could present risks to all cryptography-based systems. Cryptaur may be prone to attacks on its infrastructure intended to steal information about its technology, financial data or user information or take other actions that would be damaging to Cryptaur, users of the Cryptaur Platform, holders of CPTs. Any significant breach of Cryptaur security measures or other disruptions resulting in a compromise of the usability, stability and security of Cryptaur network or services (including the Cryptaur Platform, CPTs) may also adversely affect the trading price of CPTs.

Cryptaur's infrastructure network is in part established through servers that which it owns and houses at the location facilities of third parties, and servers that it rents at data center facilities of third parties. If we are unable to renew its data facility lease on commercially reasonable terms or at all, we may be required to transfer our servers to a new data center facility, and may incur significant costs and possible service interruption in connection with the relocation. These facilities are also vulnerable to damage or interruption from, among others, natural disasters, arson, terrorist attacks, power losses, and telecommunication failures. Additionally, the third party providers of such facilities may suffer a breach of security as a result of third party action, employee error, malfeasance or otherwise, and a third party may obtain unauthorised access to the data in such servers. As techniques used to obtain unauthorised access to, or to sabotage systems change frequently and generally are not recognized until launched against a target, Cryptaur and the providers of such facilities may be unable to anticipate these techniques or to implement adequate preventive measures. Any such security breaches or damages which occur

which impacts upon Cryptaur infrastructure network and/or the Cryptaur Platform may adversely impact the trading price of CPTs.

General global market and economic conditions may have an adverse impact on Cryptaur operating performance, results of operations.

Cryptaur development and/or CPTs may be affected by newly implemented regulations

Cryptocurrency trading is generally unregulated worldwide, but numerous regulatory authorities across jurisdictions have been outspoken about considering the implementation of regulatory regimes which govern cryptocurrency or cryptocurrency markets. Cryptaur or CPTs may be affected by newly implemented regulations relating to cryptocurrencies or cryptocurrency markets, including having to take measures to comply with such regulations, or having to deal with queries, notices, requests or enforcement actions by regulatory authorities, which may come at a substantial cost and may also require substantial modifications to the Cryptaur Platform.

This may impact the appeal of the Cryptaur Platform for users and result in decreased usage of the Cryptaur Platform. Further, should the costs (financial or otherwise) of complying with such newly implemented regulations exceed a certain threshold, maintaining the Cryptaur Platform may no longer be commercially viable and the Cryptaur may opt to discontinue the Cryptaur Platform and/or Cryptaur Tokens. Further, it is difficult to predict how or whether governments or regulatory authorities may implement any changes to laws and regulations affecting distributed ledger technology and its applications, including the Cryptaur Platform and CPTs.

Cryptaur may also have to cease operations in a jurisdiction that makes it illegal to operate in such jurisdiction, or make it commercially unviable or undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction. In scenarios such as the foregoing, the trading price of Cryptaur Tokens will be adversely affected or Cryptaur Tokens may cease to be traded.

There may be unanticipated risks arising from CPTs and or Cryptaur Platform.

Cryptographic tokens such as CPTs are a relatively new and dynamic technology. In addition to the risks provided herein, there are other risks associated with your purchase, holding and use of CPTs, including those that Cryptaur cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the risks discussed herein.
